1 Question 3

25 The Mule 24 I Am Not a Witch 23 The Favourite 22 Mission: Impossible –
Fallout 21 Bisbee '17 20 Burning 19 Leave No Trace 18 A Prayer Before Dawn
17 The Endless 16 Paddington 2 15 Filmworker 14 The Ballad of Buster Scruggs
13 24 Frames 12 Shoplifters 11 A Private War 10 Thunder Road 9 Eighth Grade
8 Zama 7 First Reformed 6 You Were Never Really Here 5 Cold War 4 The Rider
3 Love After Love 2 Annihilation 1 Mandy

The data shows the 25 best movies of 2018. It interests me because I would like to know the best movies of 2018. It may not be useful to me at some point in the future but it helps me to practice R. I did not see any online tutorials.

2 Question 4

The data is interesting to me because people have more positive opinions to iPhone XS Max than negative opinions. The packages that I use include `twitteR`, `tm`, `wordcloud`, `RcolorBrewer`, `SnowballC`, `syuzhet`, `tidyverse`, `tidytext`, `ggplot2`, and `forcats`.
