1 ANSWER

The data source that I would be interested in scraping from is tweets that include a particular hashtag.

5d. Type of mydf is a list. Type of mydfplayers is a data.frame.

6.4 Type of df1 is a data.frame. Type of df is a SparkDataframe.

6.5 It shows an error message "Error in (function (classes, fdef, mtable):unable to find an inherited method for function 'select' for signature 'data.frame', 'NULL'"

The reason for this may be the df1 is a dataframe but a SparkDataframe. SparkR could not read dataframe.

6.6 It shows an error message "Error in (function (classes, fdef, mtable):unable to find an inherited method for function 'filter' for signature 'data.frame', 'logical'"

The reason for this may be the df1 is a dataframe but a SparkDataframe. SparkR could not read dataframe.
